

Agent Commerce Readiness for Public Goods

30-day engagement preparing the storefront for AI shopping agents and the agent-to-agent commerce surface that follows.

SERVICE PROVIDER

Blackwell Enterprises

Agent commerce infrastructure for consumer DTC brands.

CLIENT

Public Goods

PublicGoods.com

BACKGROUND

AI shopping agents (ChatGPT, Perplexity, Gemini, Google AI Mode, Claude, Copilot) now mediate category discovery and brand comparison, and increasingly mediate transactions on behalf of users. Merchants whose catalog, pricing, and review data are not legible to those agents are omitted from the consideration sets agents build. Public Goods has already built sophisticated agent-discovery infrastructure (UCP, MCP, agents.md, llms.txt) at parity with the strongest brands in its category. The content and structured-data layer that makes that infrastructure pay off is the gap this engagement closes.

ENGAGEMENT AND SCOPE

Following the AI visibility audit Blackwell delivered separately, this engagement is the 30-day implementation sprint that closes the gaps the audit identified, structuring catalog, pricing, and review data so agents discover, cite, recommend, and (where the protocol permits) transact with Public Goods accurately.

- 1. **Catalog, pricing, and review remediation.** Per-variant offers and SKU/GTIN population in product schema. Member tier pricing as machine-readable structured data. FAQPage and Review schema across product detail pages. Resolution of policy contradictions across customer-facing pages. Custom llms.txt content map with brand context. Sitemap hygiene and noindex of deprecated content.
- 2. **Benchmark setup and verification.** Joint benchmarks set at kickoff. Re-measured at day 30 across coverage rate in ChatGPT/Perplexity/Gemini, composite AI visibility score, schema validator pass rate, and surfacing rate of deprecated content. Schema validator pass at 100% required for sign-off.

WHAT WE NEED FROM PUBLIC GOODS

- 1. **Single point of contact** with authority to approve site changes and answer policy questions within one business day.
- 2. **Shopify theme deploy access**, or a designated Public Goods engineer paired with Blackwell for theme template and structured-data deploys. Read-only Shopify admin access for the engagement.
- 3. **Openness to discuss three questions early in the sprint:** how shipping policy should read across customer cohorts (post-4/1/2025 members, legacy members, non-members); how to treat /pages/legacy-membership going forward (options range from a light noindex to a 301 redirect to the current membership page); and whether member pricing should be exposed in public JSON-LD with eligibleCustomerType, or kept post-login. We bring recommendations; the calls are Public Goods's.

CONTINUED WORK

The 30-day engagement is Phase 1. Continued work, scoped after Phase 1 benchmarks land, covers weekly AI behavior monitoring, entity establishment, AI training corpus management, competitive intelligence on agent-readable surfaces, AI shopping platform partnership development, and protocol-evolution work as UCP, AP2, and MCP standards advance.

TEAM

Armaan Priyadarshan · Dartmouth, Math and CS
Ethan Zhou · UC Berkeley, MET (EECS and Business)

Samarjit Deshmukh · Dartmouth, Computer Science
Shamit D'Souza · Stanford, CS and Biology

TERM AND FEE

\$1,000 USD

Paid in full upfront. Refunded in full if the work does not meet the benchmarks agreed at kickoff. Covers implementation, benchmark setup, and verification. Kickoff within five business days of execution.

CONFIDENTIALITY, OWNERSHIP, TERMINATION

Once paid, all deliverables become Public Goods's property. Blackwell will not disclose Client findings or data without written consent, and may name Public Goods as a customer (brand name, work category, public benchmark deltas) for portfolio purposes. Either party may terminate with seven days written notice. If terminated before kickoff, the full fee is refunded. If the engagement runs to completion and the work does not meet the benchmarks agreed at kickoff, the full fee is refunded. In any other post-kickoff termination, Blackwell retains payment for work completed.
